

Curriculum Vitae

01 July 2021

Dr Amit Agrawal MS, DM, FRCS graduated from the University of Calcutta, India followed by Academic Surgical training and research in Nottingham, UK. Subsequently, he moved to Cambridge University Hospitals where he transformed the Cambridge Breast Unit into an international Oncoplastic Unit by introducing Breast-Surgeon led advanced Oncoplastic Breast conservations and reconstructions besides being Lead for Breast surgical quality.

He is a committee member of the UK Association of Breast Surgery; member of British Breast Group and European Society of Surgical Oncology besides an Expert Reviewer for the National Institute for Health & Care Excellence (NICE). He is founder-director of the Cambridge chest wall perforator flap and implant dissection course and a Faculty and Examiner for MSc and MS degrees in Oncoplastic Breast Surgery, University of East Anglia, UK.

Dr Agrawal lectures worldwide and has 100+ publications and presentations in both the science of breast oncology as well as on breast surgical techniques. He has performed lab-based research in endocrine therapy in Breast Cancer (focussing on resistance mechanisms following Fulvestrant therapy). During Academic Clinical Lectureship in Breast Surgery, University of Nottingham, he was Co-investigator in multiple clinical trials (including Atac, Efect, First, Poetic, Zofast, Faslodex 57/003) and currently in NeoRT, Marginprobe, Posnoc, Loris trials etc. In addition, he is an editorial board member and/or reviewer for several journals such as Gland Surgery, Clinical Breast Cancer, Breast Cancer Research and Treatment etc.
